How to use our Visual QR Code Generator

Making a Visual QR Code

Is quick & easy and will take less than a minute.
The how to below will take you step by step through the process of turning any part of a design into a QR Code.

Step 1

Start creating a new Visual QR Code by pressing the button in the Homepage.

Tip

You can scroll through the feed to explore great Visual QR Code examples done by our users. You can also like and share any QR Code you like.

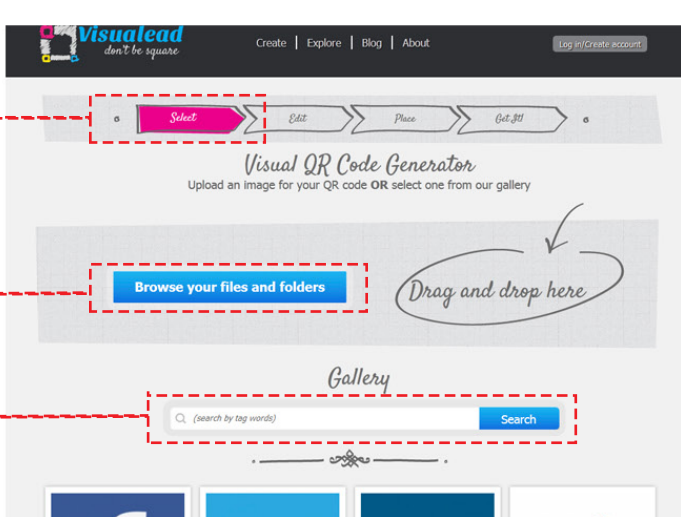

Step 2

Tip

Click on the steps if you want to go backwards at any time

Browse your computer for any image you'd like to use.

Tip

Feel free to search our Gallery and use any image from it for free t
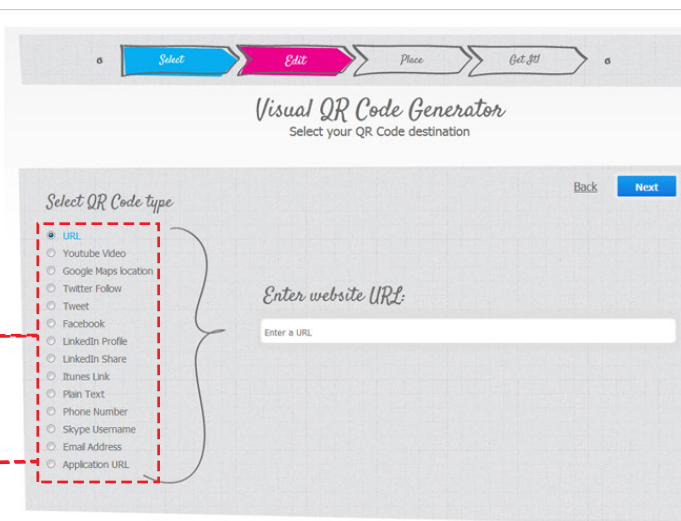

Step 3

Select the destination you want your QR Code to lead to.

Tip

You can always come back and change it later, even after you have printed your code!

Step 4

Tip

Try different locations and sizes

Place the QR Code anywhere you want on your image. You can drag, resize and rotate the QR Code.
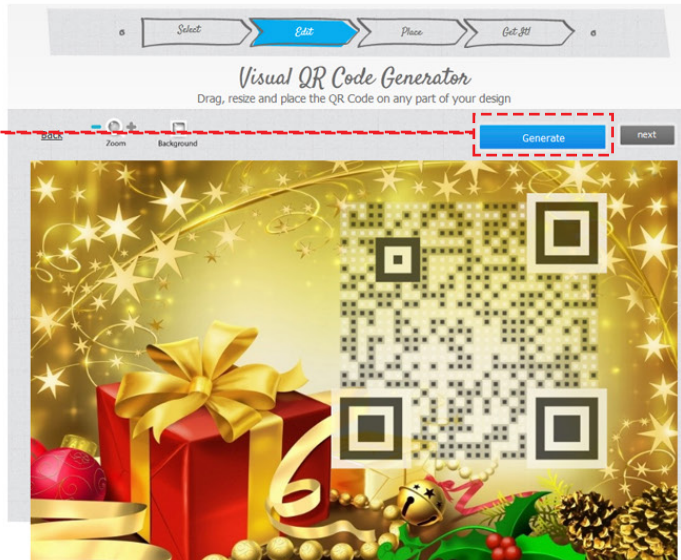

Step 5

Press Generate to merge the QR Code onto the image. You can always press on the Qr Code to try again.
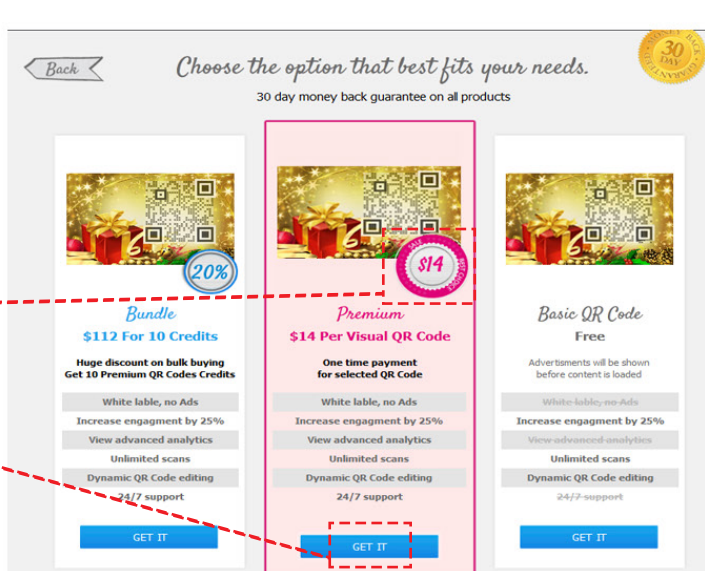

Step 6

Select your preferred QR Code type, either Premium or Free.

Tip

A Premium Visual QR Code has no ads and has advanced analytics

Step 7

Tip

You can view Analytics on your Premium QR Codes.

Welcome to your Dashboard, here you can see all your QR Codes and download, edit and share them.

Tip

Feel free to change the information of your Qr Code at any time. Click remove ads change your payment plan at any time.

Step 8

That's it!, you can now download your Visual QR Code and start using it anywhere.
